ABOUT THE PROGRAMME

Assessment is an integral part of teaching and learning in higher education, providing evidence of students' knowledge, skills and achievement of learning outcomes. PROGRAMME OBJECTIVES

1. Develop an understanding of the principles and practices of assessment in higher education, with particular emphasis on authentic assessment.
2. Examine the shift from traditional assessment approaches to authentic formative and summative assessment practices.
3. Explore the applications, opportunities and limitations of generative AI in assessment design, feedback and evaluation.
4. Learn practical skills in using AI tools to design authentic assessment tasks, rubrics and related assessment materials.
5. Promote the responsible use of AI in assessment by addressing fairness, transparency, academic integrity and human judgement.
